SUMMARY

The editorial highlights the Insights-Journal of Health and Rehabilitation (IJHR)'s recent inclusion in prominent indexing platforms—Semantic Scholar, OpenAlex, R Discovery, and Consensus. These advancements enhance the journal's visibility, credibility, and accessibility within the global academic community. By leveraging these platforms, IJHR reaffirms its commitment to disseminating high-quality, multidisciplinary research in health and rehabilitation sciences.

FROM THE EDITOR-IN-CHIEF

It is with immense pride that we reflect on the significant strides made by the *Insights-Journal of Health and Rehabilitation (IJHR)* since its inception in January 2023. Our commitment to disseminating high-quality, peer-reviewed research in health and rehabilitation sciences has been unwavering. The journal's multidisciplinary approach encompasses fields such as medical, dental, public health, physical therapy, occupational therapy, speech-language pathology, nursing, and pharmaceutical sciences, aiming to enhance clinical practices and patient care outcomes. A testament to our dedication is the recent inclusion of IJHR in prominent indexing platforms: Semantic Scholar, OpenAlex, R Discovery (by Editage), and Consensus. These platforms are renowned for their rigorous selection criteria and broad academic reach.

SEMANTIC SCHOLAR

Launched in 2015 by the Allen Institute for AI (AI2), Semantic Scholar is a free, AI-powered research tool designed to help scholars discover and understand scientific literature. It employs advanced machine learning techniques to extract meaning and identify connections within papers, offering features like automatic summarization, citation analysis, and topic modeling. With a corpus exceeding 200 million publications across various scientific domains, Semantic Scholar enhances the discoverability of research, facilitating interdisciplinary connections and aiding researchers in staying abreast of developments in their fields.

OPENALEX

OpenAlex is a comprehensive, open-source catalog of the global research system, indexing over 250 million scholarly works from approximately 250,000 sources. Developed by OurResearch, it serves as a successor to the Microsoft Academic Graph, offering detailed metadata on publications, authors, institutions, and research topics. OpenAlex supports open science initiatives by providing free access to its data, enabling researchers to explore scholarly works, analyze research trends, and foster collaborations across disciplines.

R DISCOVERY (BY EDITAGE)

R Discovery is an AI-powered literature search and reading platform developed by Editage, designed to streamline the research process for academics. It offers personalized reading recommendations based on user interests, audio summaries of research papers, and supports multiple languages, enhancing accessibility. Editage The platform integrates with reference managers like Zotero and Mendeley, allowing seamless organization of research materials. By reducing the time spent on literature searches, R Discovery enables researchers to focus more on analysis and writing.

CONSENSUS

Consensus is an AI-driven search engine that extracts and summarizes findings from scientific papers to answer research questions directly. It leverages natural language processing to identify and present consensus statements from peer-reviewed literature, aiding users in quickly understanding the prevailing scientific agreement on specific topics. This tool is particularly beneficial for evidence-based research, as it distills vast amounts of information into concise, digestible insights.

ACADEMIC VALUE AND IMPORTANCE OF INDEXING

Inclusion in these esteemed indexing platforms significantly enhances the visibility and credibility of the *Insights-Journal of Health and Rehabilitation*. For authors, this means their work is more discoverable by a global audience, potentially leading to higher citation rates and greater academic impact. These platforms also facilitate interdisciplinary collaboration by connecting researchers across various fields. Moreover, being indexed in such databases is often a criterion for academic recognition and funding opportunities, underscoring the importance of publishing in journals with wide indexing coverage. By being indexed in Semantic Scholar, OpenAlex, R Discovery, and Consensus, IJHR reaffirms its commitment to disseminating high-quality research and supporting the academic community in advancing health and rehabilitation sciences.

FROM THE PUBLISHER: HEALTH & RESEARCH-INSIGHTS

Since our establishment in 2020, Health & Research-Insights has been at the forefront of advancing clinical excellence, research, and education. Our endeavors encompass delivering exceptional clinical services, fostering continuous professional development, and promoting rigorous scientific research. The inclusion of IJHR in esteemed indexing platforms aligns with our strategic vision to elevate the journal's global footprint and academic impact. These developments are not merely milestones but catalysts propelling us toward greater innovation and collaboration. We remain committed to supporting researchers, clinicians, and academicians by providing platforms that facilitate the exchange of knowledge and the advancement of health and rehabilitation sciences. Our focus on open access ensures that valuable research is accessible to a global audience, fostering inclusivity and continuous learning.

CONCLUSION

The journey of the *Insights-Journal of Health and Rehabilitation* is marked by a steadfast commitment to excellence, inclusivity, and innovation. As we continue to evolve, we invite scholars, practitioners, and students to contribute to and benefit from this vibrant academic community. Together, we can shape the future of health and rehabilitation sciences, driving positive change and improving lives worldwide.
